

Partners

At Whiteshire Hamroc, we appreciate the opportunity to become your **Partner**. We look forward to supplying your herd with genetic inputs to maximize your production system's potential.

At the same time, we realize your need to tailor a genetic package to meet *your* specific production needs. Our goal is to allow you to custom select your genetic program with as much interaction with Whiteshire as you desire.

Whiteshire Hamroc PARTNER Program

Genetic Combinations That Work!

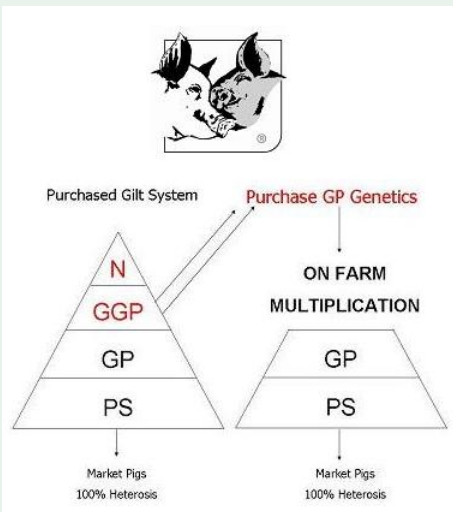

Partner Options

We're confident that one of the following Partner Options will meet your production objectives.

Partner Options 1 through 3 are similar to other genetic programs in the industry.

Whiteshire Partner Plus is our flagship program that, when added to any Partner Option, will help maximize production potential.

Please call 1-800-825-2929 ext. 12 for more information about our Partner Program.

Partner Option 1: Parent Stock (PS)

Conventional - Purchase all PS gilts at an agreed upon premium. This option requires the least amount of genetic management by the producer.

Partner Option 2: Grandparent (GP)

Grandparent internal multiplication program. Whiteshire Hamroc will supply GP stock periodically to meet the production needs for Internal Multiplication of PS gilts. Sow herds normally require around 10% of the total sow herd as GP to produce an adequate number of PS gilts. We recommend starting with 10% GP sows, then adjusting as needed.

The GP Partner Program allows for two pricing options:

- Regular premiums at delivery for GP gilts, maternal semen, and natural service boars.
- Reduced premiums at delivery for GP gilts, maternal semen, and natural service boars. Then, monthly royalties per gilt OR per weaned pig. (Minimum 3-year agreement.)

Partner Option 3: Great Grandparent (GGP)

Great Grandparent internal multiplication program. Whiteshire Hamroc will supply all necessary GGP stock to produce GP and PS for the herd. GGP sows normally make up about 2% of the total herd.

The GGP Partner Program allows for three pricing options:

- Regular premiums at delivery for GGP gilts, maternal semen, and natural service boars. GP inputs available at regular premium, along with GP semen. (Minimum 3-year agreement.)
- Same as 3A except all GGP and GP would be at PS gilt price. Then, monthly royalties per gilt OR per weaned pig. (Minimum 5-year agreement.)
- Same as 3B except monthly genetic fee would be based on sow herd size. (Minimum 5-year agreement.)

Whiteshire Partner PLUS

Whiteshire Partner Plus can be attached with any of the other options and would be charged on a monthly basis. This option allows WH to do the best job of supplying genetics that will optimize your production and marketing potential.

- Utilize web-based data input into HERDSMAN program.
 - Partner inputs data: \$.10 per pig weaned or \$2 per sow per year.
 - Whiteshire Hamroc inputs data: An additional \$.10 per pig weaned or \$2 per sow per year.
- Utilize Whiteshire Hamroc's Geneticist to assist in both maternal and terminal genetic selection based on HERDSMAN data, genetic analysis, phenotypic analysis and farm kill sheets. This service is an additional \$.15 per pig weaned or \$3.00 per sow per year.

**Whiteshire
Hamroc**

HERDSMAN is a genetic analysis software program used by Whiteshire Hamroc for over 10 years. Data entered into HERDSMAN is used to create genetic and farm management reports.
